EXPERIENCE

BukyTalk A.Ş, Remote - *Mid Level Software Developer*

July 2023 - Currently

I modernized the company's entire backend system, which was built with Spaghetti PHP and PHP Laravel, using the NestJS Framework.

Dokuzbit A.Ş, İstanbul - *Mid Level Software Developer*

March 2021 - March 2023

I contributed to the development of ERP, CRM and IOT software. In this process, I used Node.js (Fastify, NestJS) and PHP (Slim Framework) languages for the backend. For the front end I used Vue.js, Angular, Ionic, Electron and Quasar. I used Cordova and Capacitor for mobile applications. Additionally, I used C language and PlatformIO plugin for embedded systems.

Freelance, İstanbul - *Software Developer*

October 2019 - March 2021

I contributed to the development of ERP, CRM, Voice-Video calls, Messaging Applications and IOT software. In this process, I used Node.js (Fastify, Express, NestJS, Socket IO) and PHP (Slim Framework) languages for the backend. For the front end I used Vue.js, Angular, Ionic, Electron and Quasar. I used Cordova and Capacitor for mobile applications. Additionally, I used C language and PlatformIO plugin for embedded systems.

PROJECTS

Iscobox - [Detail](#)

This is an IOT project. For this project, I used Vue.js and Quasar on the frontend side. I used Fastify framework on Node.js for backend. I used Cordova for mobile application. I used the C language and PlatformIO plugin for the embedded software of the device

Home Fabrika - [Detail](#)

This is an online dance platform project. For this project, I used Angular 11 on the frontend side. I used Slim framework on PHP for backend. I used Node JS and Socket IO for chat application.

BukyTalk - [Detail](#)

BukyTalk is an initiative that I was involved in at the time. Although I completely made the software in the first steps, it was continued with the team later on and took its current form.
